

COMPANY PROFILE

Medical professionals, textile engineers, development experts, and good business people gathered from corners of the world to make a single soul and contribute to humanity's health and good. We wake up thinking about you and hit the hay, contemplating what boon we have delivered to you. In a world where health is only business, we at ECEP HAN continually innovate medical products with speed and accuracy to deliver health support around the world for good.

WHO WE ARE?

With philanthropically driven ambition and high energy, we have started the company in Istanbul/Turkey and established and delivered production lines of PPE:

Disposable Medical Products

Reusable Medical Products

Surgical Products

Within limited, short, and critical time, we have developed our International Team and offices in Arizona/USA, Geneva/Switzerland, Dubai/UAE, and Kabul and Herat/Afghanistan.

We currently operate a vast PPE production capacity, all of them tested in the USA and Europe's accredited laboratories.

We can deliver the PPE products worldwide and deliver millions of them promptly. Although we are mostly concentrating on exporting our trademarks, we are open to private labeling, marking, and development of our customer's brandings worldwide, and this makes us unique and encourages our partners to work with us.

In loving memory of ECEP HAN READ AS AJAB KHAN'

our late father, a military general, a great father, and a great man, who with his actions and without spoken words, taught us integrity, philanthropy, apparency for self and community development, patriotism, self-dignity, and self-esteem, and to work hard in an honest way, deliver promised commitments, and stay focused on the well-being of family and people; that is why our business slogan established for ECEP HAN is ECEP HAN Trading for good.

HONESTY
is our dogma;
we do best when
there is no one to see.

OUR GLOBAL PRESENCE

Our offices worldwide will enable you to find one of our representatives during work hours no matter which time zone you live in.
